

Please amend the specification as follows:

At page 2, line 25, please replace the current paragraph with the following paragraph:

“The two layers 1, 2 of the sandwich structure are kept separate from each other, mechanically fixing the protection plates 2 at a distance from the bodywork 1. The distance between the two layers is determined as a function of the nature of the projectiles to be stopped. Steel plates 1 face the interior of—or inside—a vehicle to which they are attached. Protection plates 2 face the exterior of—or outside—a vehicle to which they are attached.”

At page 3, line 32, please add the following paragraph:

“Figure 5 is a schematic view showing a vehicle provided in conformity with the invention. The vehicle has an interior and an exterior. The vehicle has a protective inner layer and outer plate, for protecting the inside of the vehicle from projectiles shot from outside.”
